EMS Seva

Calling Seva, made simple: one place for our Saints, our callers and every Sunday's EMS Congregation

From spreadsheets to one simple app

Until now: Excel

- Several sheets to keep in step
- Results counted by hand each week
- Everyone can see every number
- Easy to overwrite what was there before

Now: EMS Seva

- Each caller sees only their own list
- One tap records the result
- Coordinators see progress live
- Every change is kept in the history

Same Saints, same callers, same seva: just simpler to run.

Three roles, one app

Caller

Phones their Saints before Sunday and taps the result. Sees only their own list, on their phone.

Coordinator

Runs Calling Seva: the Saints, the calling team, who calls whom, starting calling each week and the reports.

System administrator

Sets the app up, creates the coordinators' logins and keeps backups of the data.

Saints never log in: they are the people we call.

Every week in five steps

Saturday morning

Coordinator taps Start calling

Share

Reminder sent to the seva group on WhatsApp

Call

Callers phone their Saints and tap each result

Follow

The dashboard shows progress live

Sunday

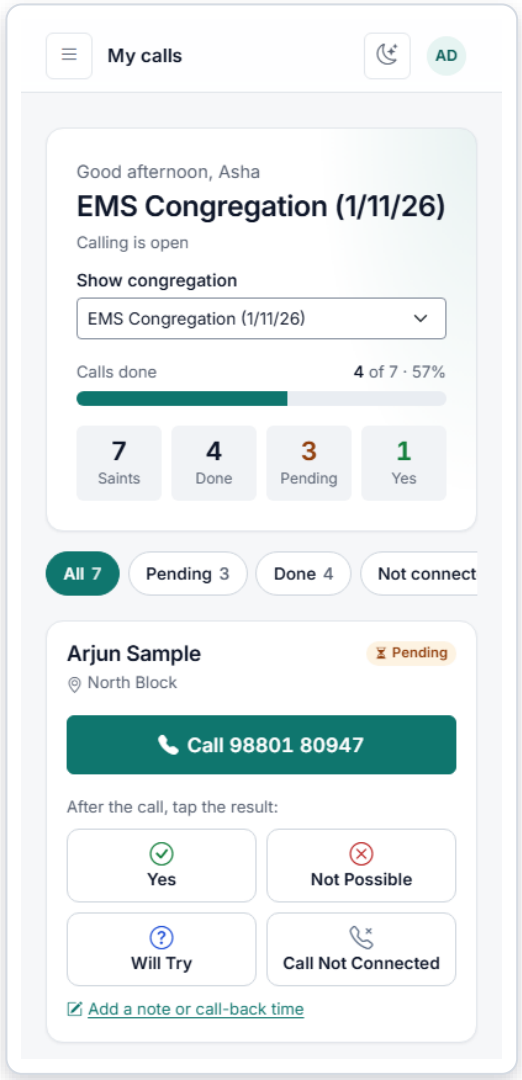

EMS Congregation; results ready to export

Next Saturday's Start calling closes the previous week automatically.

For callers

Everything happens on your phone, under My calls

My calls: your list on your phone

1

Log in

Use the username and password your coordinator gives you.

2

Tap Call

The green button dials the Saint's number for you.

3

Tap the result

Right after the call, tap one of the four buttons. It is saved straight away.

Pending calls are at the top. The numbers show Saints, Done, Pending and Yes.

Four buttons, after every call

Yes

They will come to the EMS Congregation.

Not Possible

They said they cannot come.

Will Try

They are not sure. Not counted as a Yes.

Call Not Connected

No answer, switched off or busy. Try again later.

Called again later? Just tap the new result: the latest one counts, and earlier ones stay in the history.

Good habits

Add it to your home screen

In Chrome: menu, then Add to Home screen. It opens like an app.

Notes and call-back times

Asked to call later? Add a call-back time; the Call back filter lists them.

Do not call

If a card says Do not call, the number is hidden. Never contact that person.

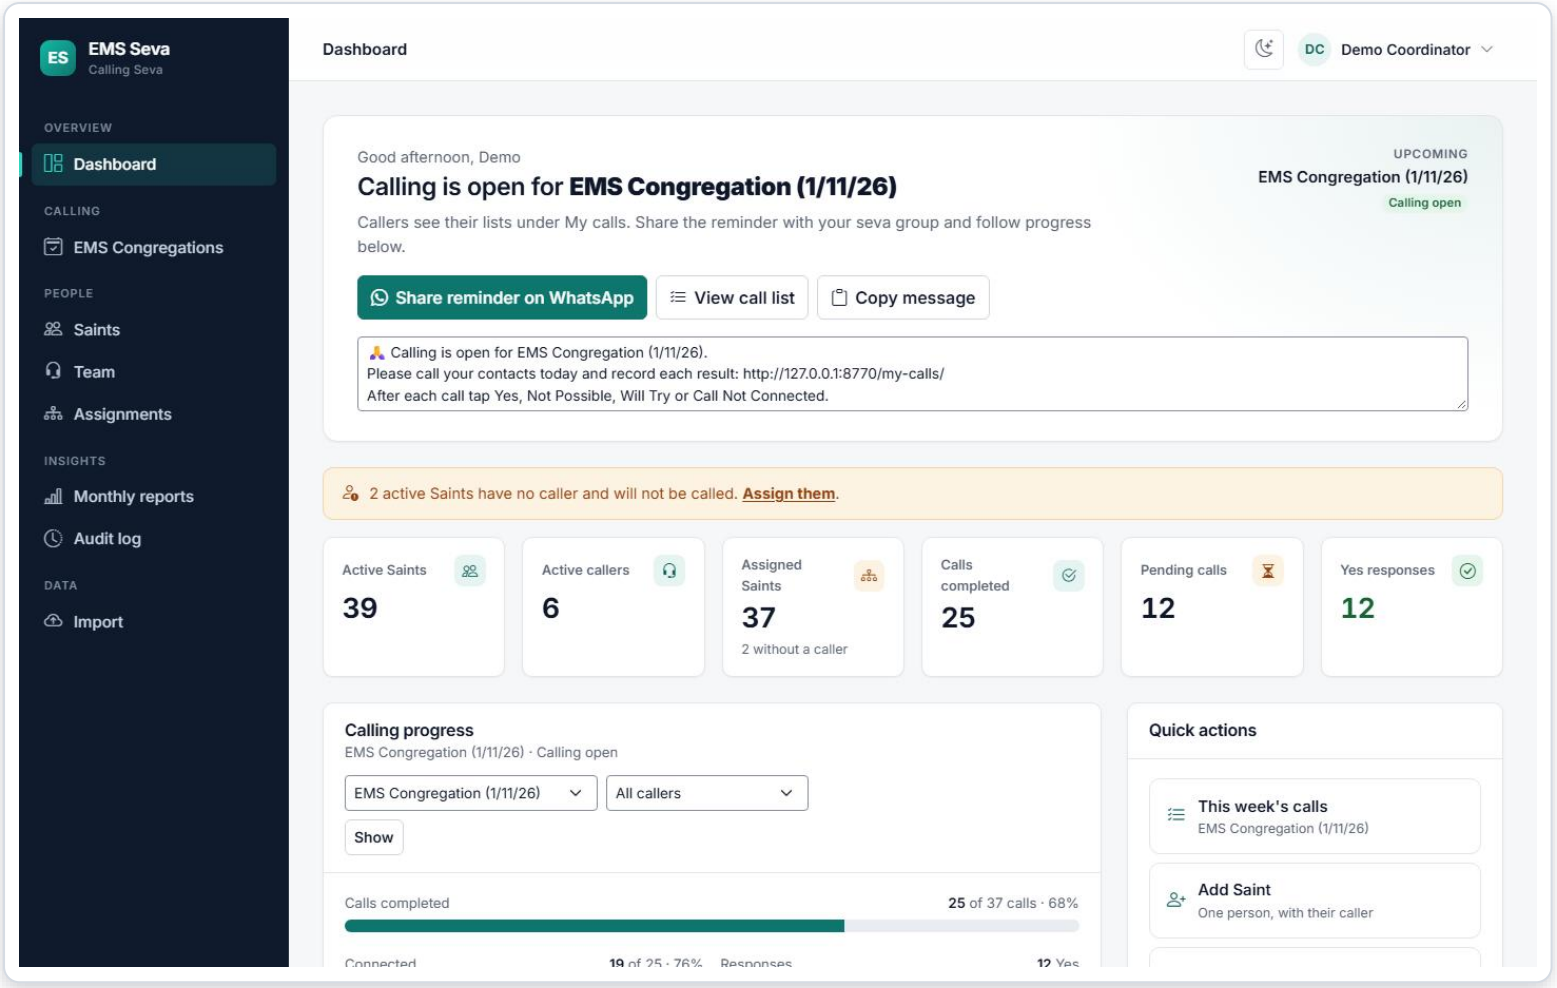

Keep numbers private

Don't share screenshots or forward numbers. Use them only for calling seva.

For coordinators

Running Calling Seva from the dashboard

The dashboard shows where things stand

One main button

It changes with the week: setup steps, then Start calling, then Share, then View results.

Live numbers

Active Saints, callers, calls done, pending and Yes.

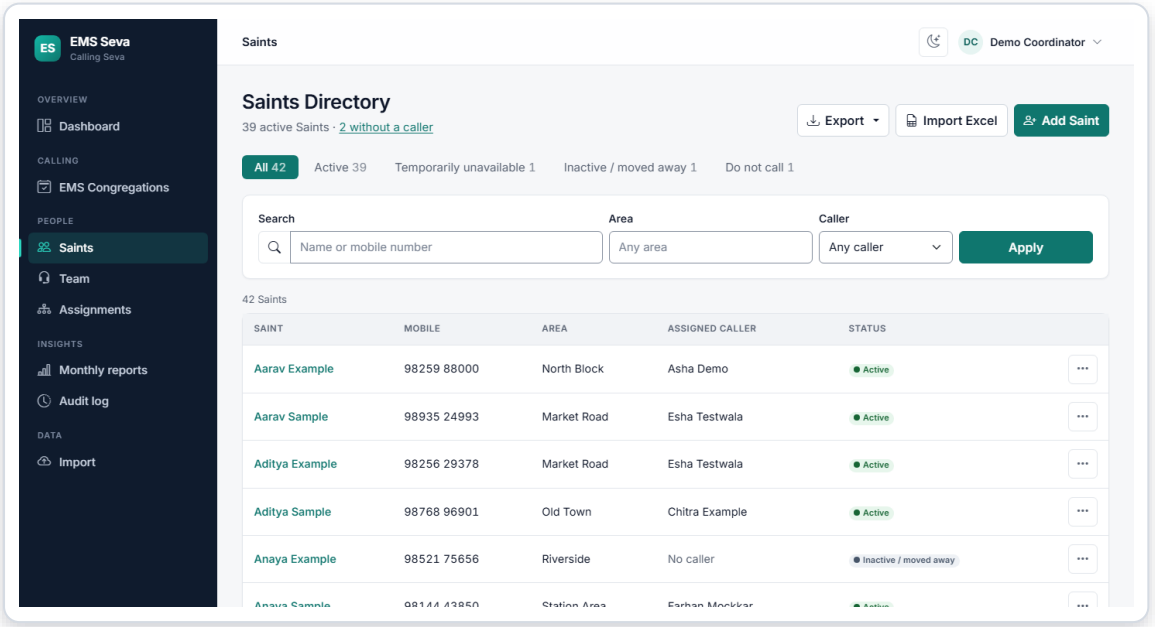

Progress per caller

See at a glance who may need a reminder.

Saints and the calling team

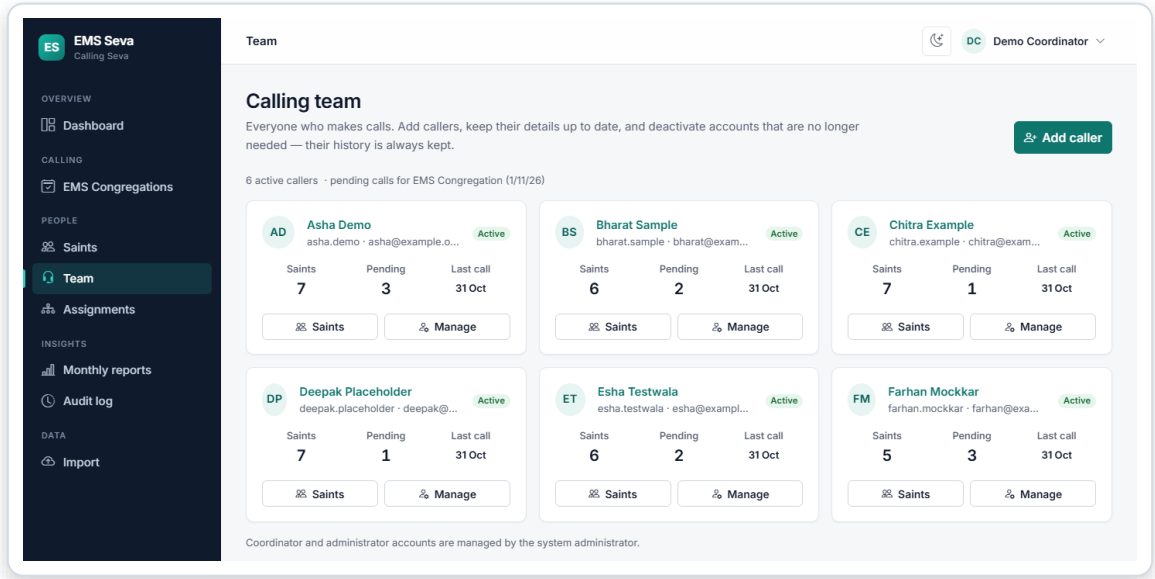

Saints Directory

Search by name or mobile. Status: Active, Temporarily unavailable, Inactive or Do not call.

Team

Add callers, reset passwords, deactivate when someone stops. History is always kept.

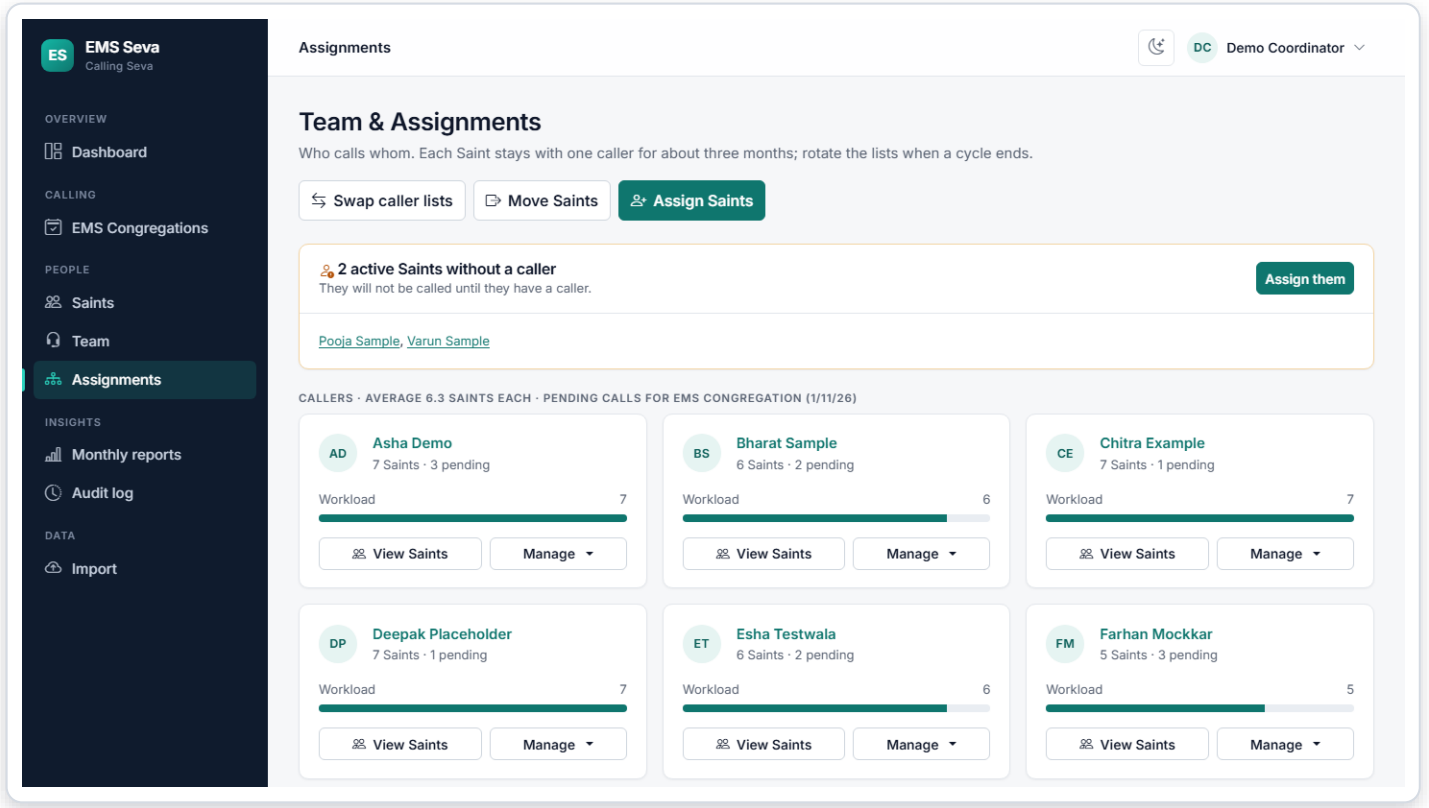

One caller looks after each Saint

~3 months

each Saint stays with the same caller, then the lists rotate

- Assign Saints who have no caller
- Move a whole list, or swap two callers' lists
- Every change is previewed before it happens
- Full history of who called whom, and why

Bringing in the Excel workbook

1. Upload

Drop in the EMS workbook. Nothing is saved yet.

2. Map columns

Matched automatically; just check them.

3. Review

Fix flagged rows and create callers' logins.

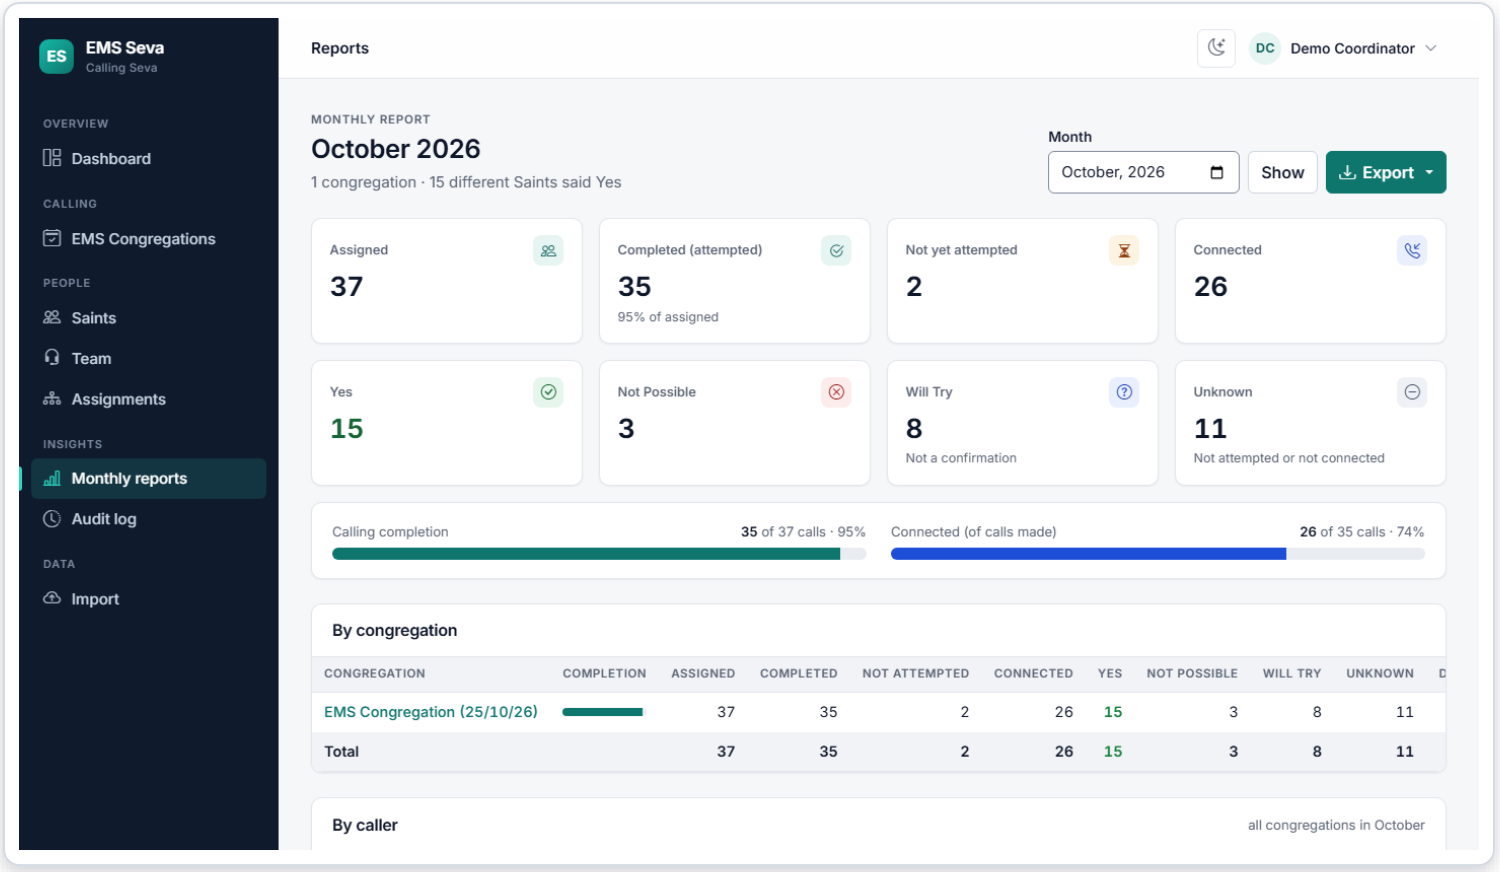

4. Import

Only now are Saints and callers saved.

Columns used: NAME, MOBILE NO, AREA, DATE and CALLING CO-ORDINATER (the caller), from the EMS STALL SEWA sheet.

Only current Saints and their callers are imported, not old weekly history. Importing the same file again never creates duplicates.

Reports you can trust

Completed

at least one attempt, any result

Will Try

is never counted as Yes

Always adds up

Yes + Not Possible + Will Try + Unknown = Assigned

Export to Excel or CSV. The audit log records every change: who, what and when.

Getting started

Four steps from today to our first Saturday on EMS Seva

1

Set up

The administrator sets up the app and the coordinators' logins

2

Import

A coordinator imports the workbook and creates the callers' logins

3

Share

Each caller receives their login privately

4

Saturday

Start calling, share the reminder, and call
